

Results: 173 ORFs found; longest ORF = 4,145 bp (NW_017732759.1_46)

Figure 6. Output from EMBOS getorf showing predicted open reading frames (ORFs) for scaffold NW_017732759.1 of *Hipposideros armiger*. A total of 173 ORFs $\geq$ 300 bp were detected across both DNA strands. The longest ORF, designated NW_017732759.1_46, spans 4,145 bp. These represent computational predictions only and are not confirmed genes without additional biological evidence such as RNA expression data.
