

Results Table

Species name	<i>Hipposideros armiger</i> (Great roundleaf bat)
NCBI Assembly accession	GCA_001890085.1

Part 2 — Original Genome Assembly Statistics

Metric	Values	Interpretation
Total assembly length (bp or Mb)	2,236,326,314	Standard genome size for a bat
Number of sequences/contigs/scaffold	7,387	Few scaffolds - good overall contiguity
Minimum sequence length	877	Shortest sequence; small fragments still present
Maximum sequence length	1,2387,654	Long scaffold- shows excellent regional assembly
Mean or average sequence length	302,738	Long average - fewer short fragments overall
N50	2,328,177	Half the genome in scaffolds $\geq$ 2.33 Mb - very strong contiguity
L50	272	Only 272 scaffolds = 50% of total - well connected
GC content (%)	35.93	AT-rich - typical for mammalian genomes

Part 3 — Five Sequence Length

Rank	Sequence ID	Length (bp)
1	NW_017731350.1	1,2387,654
2	NW_017731353.1	9,904,920
3	NW_017731352.1	9,617,682
4	NW_017731354.1	9,427,274
5	NW_017731355.1	9,400,294

Part 4 - Original vs Filtered (≥ 10 kb) Comparison

Metric	Original genome	After ≥ 10 kb filter
Total length	2,236,326,314	2,236,190,579
Number of sequences	7,387	7,247
Maximum length	12,387,654	12,387,654
N50	2,328,177	2,328,177
GC content	35.93%	35.93%

Part 5 - ORF Exploration Summary

Metric	Value
Selected Sequence	NW_017732759.1
Sequence length	193,330 bp
Minimum ORF size used	300 bp
Number of ORF's found	173
Longest ORF	4,145 bp (NW_017732759.1_46)
